INTRODUCTION

I am a Front End Engineer with 5 years of experience in creating engaging and responsive web applications. Expertise in HTML, CSS, JavaScript, and React, with a proven track record of transforming design ideas into smooth, easy-to-use interfaces. I am skilled at improving website speed and making sure they look consistent across different web browsers. I am enthusiastic about using the latest technologies to develop new solutions that improve user experiences and help businesses succeed.

WORK EXPERIENCES

2021 – Present AI-Rehman Technologies (ART)

Front-End Lead

- Design and develop fully responsive websites optimized for major browsers (Firefox, Chrome, Safari), utilizing React.js for dynamic and interactive features.
- Conduct comprehensive testing and troubleshooting to identify and resolve issues before website deployment, ensuring React components function smoothly across all browsers.
- Create responsive web pages by converting design assets from PSD, Adobe XD, and Figma into functional HTML, CSS, and JavaScript, using React.js to enhance interactivity and maintainability.
- Develop secure sign-up, login, and dashboard functionalities using React.js and Bootstrap themes, integrated with HTML and CSS for an efficient, responsive user experience.
- Design and implement mockups and landing pages in React.js, applying layout principles and aesthetic design concepts to create visually appealing and user-friendly interfaces.

2019 – 2021

Digitonics Labs

Front End Developer

- Converted complex design prototypes from tools like Adobe XD and Figma into functional, pixel-perfect web pages using React, JavaScript, and HTML5.
- Played a key role in optimizing website performance by utilizing React's component-based architecture, resulting in faster load times and smoother user interactions.
- Developed and maintained reusable React components, improving the efficiency and consistency of web projects.
- Collaborated with UI/UX designers to deliver visually appealing and user-friendly interfaces while adhering to project requirements.
- Enhanced website responsiveness across multiple devices, ensuring consistent user experience for all audiences.
